

# hubAI MANAGED SERVICES

## COVID-19 HEALTH SCREENING

In the midst of COVID-19, businesses of all sizes find themselves challenged to collect health status information from employees and stay compliant with constantly changing regulations. Our AI Managed Services offer a cost-effective solution for your business to meet compliancy mandates with no upfront investments and a simple monthly subscription.

### ROBUST MANAGEMENT REPORTING

hubAI has teamed up with UiPath, a leading Robotic Process Automation (RPA) company, to bring you automated COVID-19 Health Screening. We help employers streamline the COVID-19 screening process with our automated health survey that is easily distributed via text to all employees. Daily reports are compiled in compliance with Government regulations and are automatically sent to designated stakeholders.

#### ✓ HANDS-FREE

All we need are the mobile numbers and full names of your employees – and we'll take care of the rest!

#### ✓ AUTOMATED

The survey process is simple, hubAI will send a personalized SMS to all your employees every morning with a URL link to the COVID-19 Health Screening survey.

#### ✓ MAINTAIN COMPLIANCE

It is mandatory that each employee complete a COVID-19 Health Screening survey before entering their place of business. Our survey asks for all the information that the Government has outlined in their mandate.

### HASSLE FREE REPORTING

At the end of the day all responses are automatically compiled in one report and e-mailed to the designated person. A 30-day report compiling all employee responses will also be automatically generated as required by Government mandate.

Benefits of hubAI's Automated COVID-19 Health Screening Services:

- ✓ Ensures employee health and safety
- ✓ Scalable, easy and fast to deploy
- ✓ Secure
- ✓ No additional staff or technology investment required
- ✓ Compliant and mitigates business risk
- ✓ Eliminate paper based processes and ensure digital records are accessible
